

Ames Community School District
Ames, IA

Exhibit No. I-2
Date: January 12, 2015

BOARD AGENDA FORM

Subject: Tableau Demonstration using Student Attendance

Prepared by: Dan Andrews

Action Requested: Informational topic

Executive Summary: Tableau is a very powerful data organization and visualization tool that provides the District the ability to easily arrange, analyze and share data. It has the power to link directly to Infinite Campus (our Student Information System), creating “live” data dashboards that can shed insight to teachers, principals, and others. I will review with the Board the Tableau Reports created for our community to access. I will be sending a link for Board to access the data.
